PROFILE

A computer science student who is enthusiastic about securing a data scientist intern position. Passionate to contribute significantly in optimizing decision-making through data-driven innovation.

EDUCATION

**UNIVERSITAS NASIONAL | 2022-Present**  
Faculty of Communication Technology and Information – Computer Science  
  
Relevant Course:

- Artificial Intelligence (AI)
- Machine Learning
- Data Science
- Deep Learning
- Image Processing
- Database

EXPERIENCE

- Created a python program to predict customer churn using the Artificial Neural Network (ANN) method in google colaboratory
- Created a python program for detecting suspicious activity in non real-time video using frame extraction method, optical flow, and Random Forest (RF) algorithm
- Processed digital images using various image processing operations in python such as image enhancement, histogram equalization process, summation operation, geometric transformation operation, and more
- Created a simple restaurant database system using phpMyAdmin

CERTIFICATES

**Data Visualization Basic | 2023**  
Dicoding Indonesia

**DevOps Basics | 2023**  
Dicoding Indonesia

**Artificial Intelligence (AI) Basic | 2024**  
Dicoding Indonesia

**Structured Query Language (SQL) Basic | 2024**  
Dicoding Indonesia

**Data Science Basic | 2024**  
Dicoding Indonesia

**R Fundamental for Data Science | 2024**  
DQLab Indonesia

**Project Management Basic | 2024**  
Dicoding Indonesia

**Python Programming Basic | 2025**  
Dicoding Indonesia
